Installation Requirements

Required Patches

Below is a list of patches that you must verify are properly installed on your system before LR*5.2*395 can be installed:

- LR*5.2*286
- LR*5.2*312
- LR*5.2*344
- LR*5.2*364
- LR*5.2*372

New Functionality

- **Add Test Status to CPRS Lab Report APIs:** In the Lab Results report on the Labs tab, CPRS used to display only verified lab results. CPRS did not display Lab Specimens that had been collected but not verified with the results.

Resolution: Three reports on the Lab Tab in CPRS have been modified to address this issue.

The following reports now display the collection status:

- Most Recent
- All Tests by Date
- Selected Tests by Date

These reports on the Labs Tab in CPRS will call a modified Lab API that will provide the status of a specimen that has been collected and in process in the Lab. This patch modifies the Lab routines used in this API to accomplish the desired functionality.

Examples of the changes as will be seen in specified lab reports on the CPRS Labs tab.
